

## PUBLIC NOTICE

### IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER FAILURE TO MONITOR

**ESTE INFORME CONTIENE INFORMACIÓN IMPORTANTE ACERCA DE SU AGUA POTABLE. HAGA QUE  
ALGUIEN LO TRADUZCA PARA USTED, O HABLE CON ALGUIEN QUE LO ENTIENDA.**

#### Monitoring Requirements Not Met for Reporting of total coliform (check samples) and chlorine residuals

Our water system violated several drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

*We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During 2022 and 2023 we failed to monitor for the following contaminants and therefore cannot be sure of the quality of our drinking water during that time.*

#### What should I do?

There is nothing you need to do at this time.

The table below lists the contaminant(s) we did not properly test for during the last year, the required sampling frequency, how many samples we took, when samples should have been taken, and the date on which corrective action samples were (or will be) taken.

Contaminant	Required sampling frequency	Number of samples taken	When all samples should have been taken	When samples were or will be taken
Total Coliform	monthly and when there is a positive samples(3 check samples within 24 hours)	30/month and 3 check samples	check samples were taken within 24 hours of the positive sample	check samples were taken but not reported in DWELR until November 30, 2023
Chlorine residual	daily, weekly, and when there are positive samples per RTCR	30 & 7 check samples	July 2022	All samples were taken but the residuals for the check samples were not reported in DWELR until 12/4/2023
Chlorine residual	daily, weekly, and when there are positive samples per RTCR	30 and 1 check sample	September 2022 & October 2023	All samples were taken but the residuals for the check samples were not reported in DWELR until 12/4/2023

#### What happened? What was done? When will it be resolved?

All required check samples were taken properly, as well as the residual chlorine of each sample. Collector will make sure all results are submitted in DWELR in a more-timely fashion.

COMMONWEALTH OF PENNSYLVANIA  
DEPARTMENT OF ENVIRONMENTAL PROTECTION  
BUREAU OF SAFE DRINKING WATER

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

For more information regarding this notice, please contact Terri Hauser at 724-537-3378.
